Site Description	This is the best preserved of three heavy anti-aircraft batteries around Londonderry. Built in 1941 the site still has the remains of the battery and shelter, the munitions store, the radar ramp, and the hexagonal area around the radar. This hexagonal area contained a large wire mesh mat, (pegs from which are still visible today). The mat provided an artificial horizon for the radar, improving the performance of the device.	
Landscape Context (setting)	Rural setting in Culmore	
Site Appraisal	Well preserved	
Sensitivity	Scheduled protection	
Associations		
Recommendations	This site could tie in with the WW2 military defence heritage of the City in a tourism capacity.
